

Success Team

Students now can see their advising “Success Team” in Bay Advisor by scrolling down their login page. The team includes any advisor or support person the student is assigned to (as applicable) as well as every instructor for the term.

This is also where the *Main* advisor will be indicated for a student. The main advisor is the students go to person and students should start there. The others listed on the “Success Team” will support students as needed given their specific area of expertise.

In the example to the right; there is a **Faculty Advisor** – where students can receive major and career mentoring, a **Pioneer Success Coach** – where students gain additional academic support, and a ***Main*, Academic Advisor** – which is two separate roles. ***Main*** - where students go first for their advising, course scheduling needs and support. **Academic Advisor** – where students can discuss college specific processes and academic specialized knowledge.

All students will have a ***Main*** and **Academic Advisor** although they can be different people dependent on the student needs and associations on campus.
