## Closing-the-Loop

Consider summer mathematics boot camp (free of charge). This suggestion needs resources and approval from the program director and the dean.

Consider integrating a few linked-in learning introductory videos on mathematics as part of the course. Instructors of each course can choose to add appropriate videos on mathematics as needed. Videos on mathematics are commonly available from publishers and other library sources.

- Conversion to finite math is now happening and ECON 380 (course where assessment happens) is being modified to remove calculus.
